

# Child/Canine Safety Training

Children are our most precious resource and with approximately 68 million pet dogs in the United States, it's important that children know how to behave around, act toward, and "read" a dog's natural signals in order to stay safe. Pack Leader Training & Behavior has a fun, engaging training demonstration to teach children about dogs and how to stay safe.

A one-hour demonstration of canine behavior, how children can interact with dogs, and safety information as well as interactive games, give-aways, take-away handouts and experience with a live dog will provide children with the information and confidence they need when interacting with dogs, even their own pet.

With both an educational/teaching background and a certified dog behaviorist/trainer, Joann Neve, of Pack Leader Behavior & Training, will provide information and materials to your children in a fun, engaging manner that will help them interact with dogs and keep safe under many circumstances.

Please call for more information and to schedule a seminar
